4. A **Bachelor of Education (B.Ed.)** program is an undergraduate academic degree that is designed to prepare students for careers in teaching and education. The program typically takes four years to complete, and the specific requirements and outcomes. The outcomes of a B.Ed. program can include the following:

Development of teaching skills: B.Ed. programs are designed to help students develop the knowledge and skills necessary to become effective teachers. This can include developing lesson plans, designing instructional materials, and implementing effective teaching strategies.

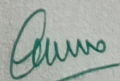

Understanding of educational theory: B.Ed. programs provide students with a strong foundation in educational theory, including learning theories, educational psychology, and curriculum design. This knowledge can help teachers to understand the needs of their students and develop effective teaching strategies.

Preparation for licensure and certification: B.Ed. programs are often designed to meet the requirements for teacher licensure or certification in the student's home state or country. This can include completing specific coursework, completing supervised teaching experience, and passing required exams.

Classroom management skills: B.Ed. programs often include coursework and training in classroom management, which can help teachers to create a positive and effective learning environment for their students.

Specialization in a particular subject area: Many B.Ed. programs allow students to specialize in a particular subject area, such as science, math, or English. This specialization can help teachers to develop a deep understanding of their subject matter and provide more effective instruction to their students.

Upon completion of a B.Ed. program, graduates are prepared to pursue careers in education, including teaching in K-12 schools, working in educational administration, or pursuing further study in education at the graduate level.

Program Outcomes

Total 10 Program are running in P.G.P.M. there are 4 U.G. and 6 P.G. Program. In its outcome are follow :

1. A Bachelor of Arts (B.A.) degree is designed to provide students with a broad-based education in the liberal arts and, as well as developing their critical thinking, problem-solving, and communication skills. The specific program outcomes of a B.A. generally include the following:

Broad knowledge in a range of subjects: B.A. degree aims to provide students with a broad understanding of the humanities, social sciences, natural sciences, and fine arts political science, economics, history, Hindi.

Critical thinking and analytical skills: Graduates should be able to think critically and analytically to solve problems, make informed decisions, and evaluate evidence.

Effective communication skills: Graduates should be able to communicate effectively, both orally and in writing, to a range of audiences.

Research skills: Graduates should be able to conduct research, analyze data, and synthesize information from a range of sources.

Ethical awareness: Graduates should have an understanding of ethical issues in their field of study and be able to apply ethical principles in their work.

Cultural awareness: Graduates should have an appreciation for diversity and be able to navigate different cultural contexts.

Quuo

PRINCIPAL

**Pahalwan Gurudeen Prasikshan
Mahavidyalya Panari Lalitpur (U.P.)**

Leadership skills: Graduates should be able to lead and work effectively in teams, and have the skills necessary for effective leadership in their field.

Career readiness: Graduates should have the skills and knowledge necessary to pursue a range of career opportunities or further study in their field.

2. A **Bachelor of Science (B.Sc.)** degree is designed to provide students with a focused education in the natural sciences, including subjects such as mathematics, physics, chemistry, zoology and botany. The specific program outcomes of a B.Sc. generally include the following in our Pahalwan Gurudeen Prasikshan Mahavidyalaya:

Understanding of core scientific concepts: Graduates should have a strong foundation in core scientific concepts and principles related to their field of study.

Scientific inquiry and problem-solving skills: Graduates should be able to design experiments, collect and analyze data, and draw conclusions based on evidence.

Mathematical and computational skills: Graduates should have strong mathematical and computational skills necessary for solving scientific problems and analyzing data.

Laboratory skills: Graduates should be able to work safely and effectively in a laboratory setting, including proper use of equipment and techniques.

Communication skills: Graduates should be able to communicate scientific concepts and findings effectively to a range of audiences, including both technical and non-technical audiences.

Critical thinking skills: Graduates should be able to evaluate scientific evidence and arguments critically, and develop logical and well-reasoned arguments to support their scientific claims.

Ethical awareness: Graduates should have an understanding of ethical issues in their field of study and be able to apply ethical principles in their work.

Research skills: Graduates should be able to conduct research, analyze data, and synthesize information from a range of sources.

PRINCIPAL

Pahalwan Gurudeen Prasikshan
Mahavidyalaya Panaji Lalitpur (U.F.)

Career readiness: Graduates should have the skills and knowledge necessary to pursue a range of career opportunities or further study in their field.

3. A **Bachelor of Commerce (B.Com.)** degree is designed to provide students with a focused education in the field of commerce, including subjects such as accounting, economics, finance, management, and marketing. The specific program outcomes of a B.Com. degree can vary depending on the institution and the specific program, but generally include the following:

Understanding of core business concepts: Graduates should have a strong foundation in core business concepts and principles related to their field of study.

Financial and quantitative skills: Graduates should have strong financial and quantitative skills necessary for analyzing financial statements, developing budgets, and making financial decisions.

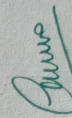

Teamwork and leadership skills: Graduates should be able to work effectively in teams, and have the skills necessary for effective leadership in their field.

4. A **Master of Arts (M.A.)** degree is a graduate-level degree that is designed to provide students with advanced education in a specific field of study in the humanities, social sciences, or fine arts. The specific program outcomes of an M.A. degree can vary depending on the institution and the specific program, but generally include the following:

Advanced knowledge and expertise: Graduates should have a deep understanding of the theories, methods, and practices related to their field of study.

Advanced knowledge and expertise: Graduates should have a deep understanding of the theories, methods, and practices related to their field of study.

Critical thinking and analytical skills: Graduates should be able to analyze and evaluate complex information, make informed judgments, and develop innovative solutions to problems.

PRINCIPAL

Mahavidyalaya Panari Lalitpur (U.F.)

Effective communication skills: Graduates should be able to communicate complex ideas and arguments effectively, both orally and in writing, to a range of audiences.

Research skills: Graduates should be able to conduct original research, analyze data, and synthesize information from a range of sources.

Ethical awareness: Graduates should have an understanding of ethical issues in their field of study and be able to apply ethical principles in their work.

Cultural awareness: Graduates should have an appreciation for diversity and be able to navigate different cultural contexts.

Leadership skills: Graduates should be able to lead and work effectively in teams, and have the skills necessary for effective leadership in their field.

Career readiness: Graduates should have the skills and knowledge necessary to pursue a range of career opportunities or further study in their field, including teaching, research, or professional practice.

5. A **Master of Commerce (M.Com.)** degree is a graduate-level degree that is designed to provide students with advanced education in the field of commerce, including subjects such as accounting, economics, finance, management, and marketing. The specific program outcomes of an M.Com. degree can vary depending on the institution and the specific program, but generally include the following:

Advanced knowledge and expertise: Graduates should have a deep understanding of the theories, methods, and practices related to their field of study.

Analytical and critical thinking skills: Graduates should be able to analyze and evaluate complex business problems, identify solutions, and make informed decisions.

Effective communication skills: Graduates should be able to communicate complex business concepts and ideas effectively, both orally and in writing, to a range of audiences.

Research skills: Graduates should be able to conduct original research, analyze data, and synthesize information from a range of sources.

PRINCIPAL

Pahalwan Gurudeen Prasikshan
Mahavidyalaya Panari Lalitpur (U.P.)

Financial and quantitative skills: Graduates should have advanced financial and quantitative skills necessary for analyzing financial statements, developing budgets, and making financial decisions.

Ethical awareness: Graduates should have an understanding of ethical issues in their field of study and be able to apply ethical principles in their work.

Technological proficiency: Graduates should be able to use relevant technology and software to analyze and manage business data.

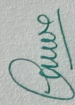

Leadership skills: Graduates should be able to lead and work effectively in teams, and have the skills necessary for effective leadership in their field.

Career readiness: Graduates should have the skills and knowledge necessary to pursue a range of career opportunities or further study in their field, including management positions in business or government, or pursuing doctoral studies in a related field.

Some of the common courses that are part of an M.Com. program include:

Financial Accounting
Managerial Accounting
Economics for Managers
Corporate Finance
Business Statistics
Marketing Management
Human Resource Management
Operations Management
Entrepreneurship
Strategic Management

6. A **Master of Science (M.Sc.)** degree is a postgraduate degree that is focused on advanced study and research in a specific field of science. The program typically requires a bachelor's degree in a related field and is designed to provide students with advanced knowledge and skills in their chosen field.

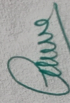

PRINCIPAL

**Pahawan Gurudeen Prasikshan
Mahavidyalaya Panari Lalitpur (U.P.)**

M.Sc. programs can be found in a variety of fields, including natural sciences, social sciences, engineering, technology, and mathematics. The specific program outcomes and requirements can vary depending on the institution and the program, but generally involve coursework, research, and the completion of a thesis or research project.

The program is typically structured to provide students with a deep understanding of the theories, principles, and practices related to their field of study, as well as advanced research skills and the ability to apply their knowledge to real-world problems. Graduates of a M.Sc. program may pursue careers in academia, research, industry, or government, or continue their education in a doctoral program.

Program. In its outcome are follow :

1. **Bachelor of Arts (BA):** The BA program is a popular undergraduate degree that provides students with a comprehensive understanding of various disciplines such as Hindi, English, sociology, history, Political Science, economics, Education subject are available in our college program 2s The outcome of the program is that it equips students with excellent critical thinking, communication, and analytical skills. Additionally, it provides students with a solid foundation in inclusive education, writing, and problem-solving, making them well-suited for a variety of careers such as journalism, teaching, marketing, and other government non government areas.
2. **Bachelor of Science (B.Sc.):** The B.Sc. program is an undergraduate degree that offers students a deep understanding of scientific principles and practices across various fields such as zoology, botany, chemistry, physics, and mathematics. The outcome of the program is that it prepares students for careers in science-related fields such as research, healthcare, technology, and more. Additionally, it equips students with strong analytical, research, and problem-solving skills, making them well-suited for advanced study in graduate and professional programs.
3. **Bachelor of Commerce (B.Com):** The B.Com program is an undergraduate degree that focuses on accounting, finance, and business management. The outcome of the program is that it prepares students for careers in finance, banking, accounting, marketing, and other business-related fields. Additionally, it equips students with strong analytical and quantitative skills, making them well-suited for graduate study in business and related fields.

Classroom management skills: B.Ed. students should also learn effective classroom management techniques, including how to create a positive classroom environment, how to

PRINCIPAL

**Pahalwan Gurudeen Prakashan
Mahavidyalaya Panari Lalitpur (U.P.)**

manage behavior issues, and how to build positive relationships with students and their families.

Professionalism: B.Ed. students should develop a professional demeanor and learn about the ethical and legal requirements of teaching. They should also learn how to work collaboratively with other educators and professionals, as well as how to engage in ongoing professional development.

Reflective practice: B.Ed. students should develop the ability to reflect on their teaching practices and make adjustments based on feedback and student needs. They should also learn how to engage in ongoing self-reflection and assessment to continually improve their teaching skills.

Certification: Upon successful completion of the program and any required licensure exams, students should be prepared to meet the certification requirements to become a licensed teacher in their chosen field or subject area.

B.Ed. program

4. A **Bachelor of Education (B.Ed.)** program is an undergraduate degree program that is designed to prepare students for a career in teaching. The program typically takes four years to complete and provides students with the knowledge and skills necessary to teach in a variety of settings, including elementary, middle, and secondary schools.

B.Ed. programs vary in their structure and content, but common elements may include:

General education courses: B.Ed. programs often include general education courses in subjects such as English, mathematics, science, and social studies. These courses provide students with a broad knowledge base that they can draw upon when teaching their own subjects.

Education courses: B.Ed. programs typically include a range of education courses that cover topics such as educational psychology, teaching methods, classroom management, assessment and evaluation, and curriculum development.

Field experiences: B.Ed. students typically participate in field experiences, such as student teaching or practicum placements, in which they work in real classrooms under the guidance of experienced teachers. These experiences provide students with the opportunity to apply their knowledge and skills in a real-world setting.

Specializations: Some B.Ed. programs offer specializations in specific subject areas or grade levels, such as early childhood education, mathematics education, or secondary education.

Pooja
PRINCIPAL

Pahalwan Gurudeen Prasikshan
Mahavidyalaya Panari Lalitpur (U.P.)

Licensure: Upon successful completion of a B.Ed. program and any required licensure exams, graduates may be eligible to obtain a teaching license or certificate, depending on the requirements in their state or province.

Overall, a B.Ed. program provides students with a comprehensive education in both their subject area and the art and science of teaching, preparing them for a fulfilling and rewarding career in education.

5. **Master of Arts (MA):** The MA program is a postgraduate degree that provides students with advanced knowledge and skills in a specific discipline such as, sociology, Hindi, education subject in 2019-22 session. Outcome of program is that it prepares students for careers in teaching research journalism and other related field- additionally it equips students with advanced, critical thinking, communication skill and making them well suited for advanced study in doctoral program.

their interests and career aspirations. It also emphasizes the importance of experiential learning and offers students opportunities to gain practical experience through internships, fieldwork, and other activities.

Multilingualism and Cultural Awareness: The NEP 2020 emphasizes the importance of multilingualism and cultural awareness in education. It promotes the use of regional languages as a medium of instruction and encourages students to learn multiple languages to promote cultural exchange and understanding.

Technology-enabled Learning: The NEP 2020 recognizes the importance of technology in education and encourages the use of technology-enabled learning tools and resources in our college. It also promotes the development of digital infrastructure and provides opportunities for students to develop their digital literacy and skills.

Professional Development of Teachers: The NEP 2020 emphasizes the professional development of teachers and provides various opportunities for teacher training and up skilling. It encourages the adoption of innovative teaching methods and pedagogies to enhance the quality of education in our college.

Overall, the NEP 2020 program aims to transform the education system in India and provide students with a high-quality and relevant education that prepares them for the future

Outcome report of our college program

Academic Knowledge and Skills: our college programs provide students with a strong foundation in academic knowledge and skills related to their chosen field of study. Students develop a deep understanding of theoretical concepts, research methods, and practical applications of their subject, preparing them for various career paths.

Communication and Interpersonal Skills: our college programs also equip students with excellent communication and interpersonal skills. Through various classroom activities, group projects, and presentations, students learn how to articulate their ideas, collaborate with others, and express themselves effectively in different settings.

Critical Thinking and Problem-Solving Skills: our Degree college programs also foster critical thinking and problem-solving skills among students. They learn how to analyze complex information, identify patterns and connections, and develop innovative solutions to real-world problems.

Career and Professional Development: our Degree college programs provide students with opportunities to develop their career and professional skills. Many programs offer internships,
